

Forensic case report

Case:	LIVE_AUDIT_DAHUA
Reference:	Live test
Examiner:	Auditor
Custody chain:	INTACT
Report generated:	2026-09-09 17:24:18 UTC
Tool:	Pramaan 0.6.0

Evidence

File	SHA-256	MD5	Bytes	Acquisition	Write blocker
20.49.55-20.50.21_M_0_0_0_.dav	f64b8884169315f3...	9d2c4f39bbf73415...	27503704	Logical file acquisition	Source opened read-only (software)

Capability & validation scope

Recovery in this case used: Dahua DHAV frame carve. The table below lists every parser the identification scan considered for this evidence.

No parser is field-validated without independent recorder media. Dahua recovery is a DHAV frame carver (DHFS4.1 is a detection marker only). Hikvision uses HIKBTREE index + MPEG-PS carve. Honeywell has a fixture-tested experimental parser. When identification is inconclusive, select an adapter manually on Recovery.

Vendor	Adapter	Tier	Scope
Dahua	Dahua DHAV frame carve	Experimental parser	Proven on builder and known fixtures only

Timeline normalization

Device 25fa65614e57... drift +0.0s · adapter Dahua DHAV frame carve

Recovery summary

Recovery run	Status	Vendor	Adapter	Segments in catalog
8dd24b53fde3...	Completed	Dahua	Dahua DHAV frame carver	1

Segment provenance

Ch	Byte start	Byte end	Parser	Allocation	Artifact SHA-256
0	0	27503704	Dahua DHAV frame carve	Structurally complete (no allocation map)	f64b8884169315f3...

Investigative leads (examiner-selected)

Leads marked INCLUDED by the examiner. These are analytical hints only, not verified evidence.

Type	Label	Into clip	Confidence	Finding ID
No examiner-selected leads.

Methodology

Tier 1 DHAV + HIKBTREE index to H.264 NAL extraction, Tier 2 filesystem undelete and H.264 carve

The examiner named above certifies that the acquisition, recovery and analysis recorded here were carried out as described, and that the custody chain is as stated.
